

TimeTronics FieldTablet

SUPPLIED BY GIMTRAC (PTY) LTD

SPECIFICATIONS

Category	Athletics, Sports Timing Equipment
Origin	Supplied by Gimtrac (Pty) Ltd

DESCRIPTION

The FieldTablet makes it easy to enter and provide live field event results to athletes, spectators and officials, using a wireless network and the AthleticsManager data management software.

FieldTablets are Android tablets continuously connected by wi-fi to the AMserver, field scoreboards, WindSpeed and the electronic laser distance measurement system. Field event participants are entered and seeded in AthleticsManager just like race events, and loaded into the FieldTablet at start-up by selecting the AMserver and field event. AthleticsManager receives field results live from the FieldTablets; results can also be entered manually afterwards.

Required side products

The FieldTablet works with AthleticsManager software and the wireless network set (TTC-032) – standard with AthleticsManager International (TTC-098), optional for AM Club (TTC-096) and AM National (TTC-097).

TimeTronics product code: TTC-245

Supplied by Gimtrac. Gimtrac (Pty) Ltd supplies, installs and supports TimeTronics timing equipment in Southern Africa. Prices on request – contact us with your venue and events and we will quote the configuration that suits you.
