

Hockey Court Surface

SUPPLIED BY GIMTRAC (PTY) LTD

SPECIFICATIONS

Category	Hockey, Sport Flooring & Surfaces, LOKFLOR, LOKFLOR Sports Surfaces
Origin	Supplied by Gimtrac (Pty) Ltd

DESCRIPTION

The Lokflor Hockey Court Surface comes in two variances:

- An outdoor court which is 55 x 43 meters (2365 m²)
- And an indoor court which is 50 x 25.4 meters (1270m²)

The LOKFLOR Hockey Court Surface is an all-weather, self-draining, indoor & outdoor interlocking sports surface that is made from LLDPE polymer from SASOL.

The LOKFLOR surface reduces injury and fatigue through its multi-directional flex technology and has a cooler playing surface due to the airflow around the playing surface. The edging ramp is installed to prevent tripping and secures the surface to the base structure to prevent the surface from migrating.

The self-draining LOKFLOR sport surface allows play to resume directly after a rain shower without having to dry the surface and is virtually maintenance-free. A pressure cleaner and leaf blower can be used to keep the surface clean if anything is spilled or lands on the surface.

The LOKFLOR surface has a G1 anti-slip surface structure and will not be damaged by general footwear but soft rubber-soled shoes are advised to prevent slipping on the surface. The Lokflor Hockey Court can be installed over an existing hard sports surface with some maintenance required from time to time.

The benefits of the LOKFLOR Hockey Court Surface include the following:

- The court may be uplifted and relocated relatively quickly,
- The Straight lines are made of individual quarter tiles and no painting is required,
- The circular markings are painted with repainting every 4 – 5 years,
- It weighs 3,3 Kg per m² and,
- Logos can be printed - size restriction of 3 x 2 meters at an additional cost.

Guarantee: It's a 100% South African product and has a 15 year guarantee against U.V. degradation and a 20 year life expectancy.

ORDERING & DELIVERY
