Monaco, 20 January 2025

Dear Mr. Peeters,

Technological devices other than the reaction time measuring module of the Start Information System (SIS) (e.g., Timing Systems, Wind Gauges, Distance Measuring Equipment etc.) used in athletics are not issued a certificate by World Athletics and therefore no certified lists for such devices are available.

The FalseStart III Pro Wireless and FalseStart III Club Wireless (optionally Wired) accelerometer-based reaction time measuring devices of the SIS by TimeTronics (firmware 2.0 and sensitivity setting: 40) meet the current requirements for a World Athletics Product Certificate.

All measuring equipment used in competition shall be manufactured and calibrated according to international standards. The accuracy must be guaranteed by the manufacturer according to the relevant international standards and shall have been verified by an appropriate organisation accredited by the national measurement authority.

To our knowledge and experience, the equipment of TimeTronics meets this condition and is also successfully used in international athletics competitions organised under World Athletics Rules and Regulations.

Sincerely,

Alexander RAZEN
Technical Services Manager
Competition and Events Department
